Senior Product Designer • Product Strategy

10+ years across visual, UX and product design, combining product strategy, research and strong visual craft to turn ambiguous problems into products people can actually use and enjoy.

Experience

SAP
Product Strategy • SAP Managed
Current • Brussels, Belgium

- Shaping portfolio-level product strategy across SAP-managed products and AI initiatives, mapping capabilities, ownership and cross-product dependencies.
- Leading research for a unified observability experience, identifying how users could monitor and understand AI-agent activity across fragmented product surfaces.
- Turning fragmented product information into shared roadmap, risk and decision views for executive alignment.

SAP
Senior UX Designer • Fabric Platform
2025 – 2026 • Brazil – Belgium

- Shaped a future-state interaction concept for AI agents, translating emerging product and technology capabilities into a cohesive experience vision presented to SAP's Executive Board and Supervisory Board.
- Redesigned Fabric's onboarding, reducing onboarding effort by 91%.
- Designed unified developer experiences, bringing together SDKs, APIs and services, translating complex technical workflows into coherent user journeys.

SAP
Senior UX Designer • Procurement
2025 • Brazil

- Designed AI-assisted product experiences for SAP Procurement, supporting category managers in planning and strategic decision-making.
- Facilitated cross-functional workshops to uncover user needs, align product direction and explore new product frontiers.

Deskfy
Senior Product Designer
2024 – 2025 • Brazil

- Designed core social media integration, contributing to a 90% increase in feature engagement.
- Owned and evolved the product design system while improving design-to-development workflows and reducing implementation time.

Loopt
Staff Product Designer
2023 – 2024 • Brazil

- Led product design across multiple zero-to-one ML products for ports and logistics operations.
- Conducted field research and interviewed 30+ industry key players, translating complex physical workflows into digital products.
- Designed a solution adopted by 100% of its 200+ users within the first week, achieving 98% usability satisfaction. The implementation later reported about 50% fewer unproductive container moves and 33,000 litres of diesel saved in one month.

Dietbox
Research UX Designer
2023 – 2024 • Brazil

- Combined qualitative research, behavioral analytics and product metrics to identify gaps and opportunities and influence product priorities.
- Led a SUS study with 1,000+ responses, complemented by NPS research, to validate a major product redesign during implementation.
- Established research practices spanning user interviews, usability tests, heuristic evaluations, heat maps and behavioral analytics.
- Moved the organization toward a more evidence-driven product development process.

Apple Developer Academy
Selected Participant
2021 – 2023 • Brazil

- Selected for an intensive Apple program combining product design, user research and software development.

Earlier Design Experience
UX, Visual & Motion Design • 2014 – 2021

- SAP • Fleeter • Berro • Competence • Paim • Wombat
- Selected clients: Netflix • Nike • Coca-Cola • Carrefour • Deliveroo

Education

Postgraduate Program in UX Engineering
PUC • 2026

Digital Game Development Degree
UNIFCV • 2020
